COVENANT OF THE ENLIGHTENED ORDER OF BATTLE

V3.06

The architects of the Dystopian Age, the Covenant of the Enlightened wield their formidable intellects to sweep aside those who stand in the way of Science and Progress. These masters of technology covet knowledge above all things and believe that it is only they who can steer humanity on a path to enlightenment. Whether with monstrous fusions of man and machine or with their terrifying and wondrous war-engines, the Covenant of the Enlightened take every opportunity to demonstrate their technological supremacy. The discoveries that were intended to herald a new era for humanity are instead used to punish those who would misuse them. Only when the Covenant are lauded as the rightful leaders of the Earth this new Dystopian Age can the world be brought into a new dawn of achievement and prosperity.

This document is the Order of Battle for the Covenant of the Enlightened, known in shorthand as an ORBAT. Once you have agreed the points limit for your Encounter, each player must consult their Faction's ORBAT. This allows a player to create a Force for the Covenant of the Enlightened in games of Dystopian Wars. We have also made Unit cards available too, for quick reference in games.

Important: For the avoidance of doubt, the rules presented in the latest version of the ORBAT always take precedence over any Unit or Battlefleet rules presented elsewhere.

SPECIAL RULES

ENLIGHTENED ACTION QUALITY

It is a closely guarded secret that microwave agitation can cause catastrophic reactions in materials that have been exposed to Element 270. Covenant Forces have the following Quality on some weapons:

AGITATION: A Lead Weapon with this Quality contributes Action Dice equal to the Target Model's Mass. Target Models with a Mass of 4 or greater are treated as having a Mass of 4 for this purpose. This number is multiplied, depending on range band etc. See the Weapon Reference table for details. Weapons with the Agitation Quality only ever contribute Action Dice equal to the Mass of the Target when used in Support and cannot be used with the Heavy Firepower rule.

Some Units have special rules that are different to those found in the rulebook. Units that have one or more of these rules will have them listed in their Unit profiles in this ORBAT.

ABLATIVE ARMOUR: When the Initial Target of an Attack, this Unit can affect a number of Exploding Hit results in the Attack Action Die Pool up to its Mass value. The affected Exploding Hit results do not generate additional Action Dice. Attacks with Piercing, Rail, Ramming or Submerged Qualities ignores this rule.

ABLATIVE PROW ARMOUR: When this Model is Initial Target of an Attack originating from a point in this Model's Fore arc, it uses this rule. This Unit can affect a number of Exploding Hit results in the Attack Action Die Pool up to its Mass value. The affected Exploding Hit results do not generate additional Action Dice. Attacks with Piercing, Rail, Ramming or Submerged Qualities ignores this rule.

ACCEPTABLE ATTRITION: Provided it numbers 4 Models or less at the start of the Encounter, Destroying this Unit does not confer a Squadron Killer Victory Point bonus.

ADVANCED REPAIR FACILITIES: Battle-Ready Models in this Unit with this rule may add a number of Action Dice to their own Repair Tests equal to the value of this ability. Furthermore, Models in this Unit with this rule may use their Action Dice Pool to make Repair Tests for Disorder Levels and/or Damage Markers on themselves or any friendly Models within 4". One or more Exploding Hit results from a Repair Test made by this Model may remove a single point of damage from itself or a Friendly Model within 4". A Model cannot remove more than a single point of damage per Repair Test. Repair Tests can be made on Models without Levels of Disorder or Damage Markers if desired. If the friendly Model is Crippled, it cannot have damage removed that would return it to a Battle-Ready condition.

AERIAL REPAIR PLATFORM: Roll an Action Die each time a Friendly Model with the Aerial Unit Trait is destroyed within 7" of this Unit. On a roll of a Counter or Heavy Counter the Model is not removed and instead remains in play with a single Hull point.

AGILE: Unless suffering from a Navigation Lock Critical Damage Marker, Models in this Unit with this rule may make turns during Drift movement in the same way as it usually would during normal Movement.

AGITATION HARMONISER: Weapons with Agitation Quality in this Unit gain +4 to their Attack Dice Pool and the Sustained Quality. Models with this rule may use their Battle-Ready value if the Model would usually use the Crippled value.

AMPHIBIOUS: This Unit is a Surface Unit after deployment. The Unit can move across Land and Obstacle terrain at normal Speed without suffering damage or collision. It has a Drift of zero when on Land. While this Unit is on Land or Obstacle Terrain, that Terrain is ignored for LOS purposes to and from this Unit.

ANTI-AIR SPECIALIST: Models in this Unit with this rule can choose not to count Aerial Units as being a Range Band further away (see Rulebook p.1 - Aerial Units). Instead, Model's Attacks against Targets with the Aerial Unit Trait may be measured using the actual Range Band indicated for distance. Attacks with the Aerial Quality against Aerial Units gain the Homing Quality.

APOCALYPSE PROTOCOL: Once per Activation, this Unit may make the following Action as a Valour Effect provided the Valour card discarded has a value of at least 40 (including by Valorous Conduct). Each Crippled Model in this Unit may be immediately destroyed. Each Model destroyed in this manner automatically inflicts a Catastrophic Explosion on a Model within 2".

ARMoured DECKING: Attacks with the Aerial Quality gain a single Hit from a Heavy Hit result rather than the usual two when attacking this Model. Exploding Hits are unaffected by this rule. Attacks with the Piercing Quality ignore this rule.

ATOMIC GENERATOR: *Thanks to the Watcher artefacts found in the Bimini Crater, the mysteries of splitting the Atom have begun to be understood.* The Model adds +2 to its Speed Attribute and +2 to its Turn Limit. The Model suffers an additional Point of Damage whenever it suffers a Catastrophic Explosion caused by receiving a duplicate Reactor Leak Critical Damage Marker.

AUXILIARY MINE LAYER: Before Submerged Unit Deployment, the controlling Player of this Unit may place a single Minefield Marker anywhere in the Play Area provided that it is at least 10" from any Deployment Zone.

BOMBARDMENT (X): Models in this Unit may re-roll blanks when shooting at Ground Units or Surface Units with weapons that have the Quality indicated in brackets.

CALLIMACHUS CHRONO-LATHE: During the Special Operations Step of this Unit's Activation, it may use its Callimachus Chrono-Lathe to immediately remove a point of damage from each Battle-Ready Model in single Unit within 15". You may remove additional points from the same Unit during the Activation, but you must discard a card from your hand for each additional point removed using this rule. Furthermore, as a Valour Effect during the Reserves Step, the device may be used to immediately bring a Unit from Reserve and deploy them within 3" of this Unit. The Unit brought from Reserve immediately receives the Hazard Condition but may Activate as normal this Round. A Model may not be Wavelurking while using a Callimachus Chrono-Lathe. This device is unaffected by Generator Shutdown Critical Damage.

CETACEAN LAUNCH TUBES: Physeter Assault Tokens or Orca SRS Tokens launched by Units with this rule may be Placed in base contact with a Friendly or Enemy Unit a further 5" range than normally permitted for the action. Furthermore, this Unit contributes +1 Physeter Token to any Physeter Ambush at the start of the Encounter.

CHRONO GENERATOR: *Particles of Omicron Thirty-One are held within this generator warping the flow of time within it but causing great stress on the mechanisms. This temporal pressure is released to enhance the vessel's performance. Failure to do so safely can have dire consequences.* When a Unit with one or more Chrono Generators Activates, roll an Action die and apply the result to the Unit. You may choose to continue to roll dice and apply cumulative results, once for each Chrono Generator in the Unit.

Remove a single point of damage from every Model in the Unit.

The Unit gains +1 to its Speed and Fray for the duration of the Activation.

The Unit gains +2 to a single Action Dice Pool this Activation.

The Unit gains no benefit.

The Unit gains a Level of Disorder.

CLOUD DIVE: Aerial Units with this rule may be deployed at the start of an Encounter in a Cloud Dive. Aerial Units that do so are deployed at the same time as Vanguard moves and may be deployed anywhere at least 20" from the enemy deployment zone. Aerial Units performing a Cloud Dive are Obscured until the end of that Round.

COLOSSUS: A Model with this rule may turn on the spot to face any position at the end of its Movement. It may Ram Surface Units and Skimming Units. It may make a Ramming Action even if it moves less than 3" in the Movement Phase. As the Moving Model in a Ramming Action, this Model does not suffer from Damage or Disorder.

COMBAT AIR PATROL: Units with this rule may Launch a number of SRS Tokens in the First Round of the Encounter (to a maximum of their Crippled Capacity value) against any Enemy Unit in the Play Area rather than the usual range.

COMMAND CODES: Once per Round the Player may declare they are using Command Codes to immediately cancel all the dice results in any one Action Dice Pool generated by any Friendly Unit within 15" of this Model. The Command Codes must be played before any manipulation of the Action Dice Pool takes place by either Player. The Action Dice pool is then rolled afresh exactly as if the previous Action Dice Pool had not been rolled. You may not cancel part of the Action Dice Pool or another Player's Action Dice Pool using this rule.

CORVETTE DUTY: This Model may add +1 to the Defence Action Dice Pool on any friendly Models within 5". This bonus is in addition to any other bonuses such as being part of an Attached Unit.

CROSS THE BEAMS: Once per Activation, before declaring an Initial Target, This Unit may make the following Valour Effect provided the Valour card discarded has a value of at least 40 (including by Valorous Conduct). When making an Attack, Models in the Unit's may support with the Lead value of a Particle Beamer or Heavy Particle Cannon to the Action Dice Pool, rather than the normal support value.

DECEPTIVE DEPLOYMENT: Once both sides have deployed but before any Vanguard moves have been made, the Players take it in turns (in initiative order) to redeploy a Unit in their Force with this rule. Each Unit with this rule may only be redeployed once and must be redeployed in their own Deployment area. If any Units with this rule also has one or more Shroud Generators, then it gains the Vanguard rule.

DEEP DIVE: In the Special Operations phase of the round, while Battle Ready and in Open Water, this Unit may declare it is going to Deep Dive. For the remainder of that Round, the Unit doubles its Drift Movement but cannot make any other Movement. The Unit also cannot launch SRS or make any Action that does not have the Submerged Quality. Furthermore, while it carries out a Deep Dive Special Operation, this Unit cannot be the Initial Target of any Action that does not have the Submerged Quality. A Unit cannot be part of an Attached Unit if it carries out a Deep Dive Special Operation, unless both Units have this rule. A Unit cannot carry out a Deep Dive Special Operation if it has already done so the previous Round.

DEVIL'S OWN LUCK: Once per Round, you may Cancel a Valour Effect in an Encounter where a Model with this rule is in the Play Area. The controlling Player of a Model with this rule must discard a Victory & Valour card from their hand of any value rather than having to be of a greater combined value than the card being Cancelled.

DIOPHANTUS CHAOS-ORB: In the Special Operations Step of the Operations Phase, all Enemy Models within 5" of this Model receive the Shredded Defences Critical Damage Marker unless they already have it. During the Special Operations Step of this Unit's Activation, it may use its Diophantus Chaos-Orb to draw three Victory and Valour Cards, examine them, discard two and keep one to add to the Player's hand for the Round. Then, during the End Phase, the player must discard a card of their choice from their hand. Furthermore, as a Valour Effect in the Shooting Step, the player may use the device as a Heavy Particle Cannon with a 360 Fire Arc. The Heavy Particle Cannon may also trigger its own Valour Effect in the same Step. A Model may not be Wavelurking while using a Diophantus Chaos-Orb. This device is unaffected by Generator Shutdown Critical Damage.

DISCIPLINED: Models in this Unit ignore the effects of the Emergency Disorder Condition, though still count as having Disorder at that level. Furthermore, in a Ramming Action, this Model does not suffer from Disorder.

ELITE CREW: While making or defending from an Assault, Models in this Unit with this rule may re-roll Blank dice results.

ENLIGHTENED SCIENCE: During the Special Operations Step of this Unit's Activation, roll an Action die. On the result of an Exploding Hit result, remove a single point of damage from each Model in the Unit. Furthermore, instead of suffering a Generator Shutdown Critical Damage Result, Models in any Unit with this rule may count the Result as a Sturinium Flare

ENLIGHTENED GENERATOR SHIP: While this Model is Battle-Ready, any Friendly Models with the Enlightened and Surface Model Traits counts as being equipped with the same Generators as this Model while they remain within 10" of this Model. This Unit cannot give the benefit from any Generator type to an Automata Unit.

FLAK BARRAGE (X): At the start of the End Phase, before SRS Resolution, Models in this Unit with this rule may each roll a number of Action Dice indicated by the rule. Remove one Enemy SRS Token that is in contact with this Unit or Friendly Units within 15" for each Exploding Hit result.

FOCUSED FIRE (X): When this Unit makes an Attack that includes an indicated Quality, it receives +2 Action Dice and may re-roll Blank results. This may only be used once per Quality each Activation.

FORTUNES OF WAR: You may Cancel Valour Effects in an Encounter where this Unit has at least one Battle Ready Model in the Play Area.

FORWARD DEPLOYMENT: Units with this rule can never be held in reserve at the start of an Encounter. They must be deployed anywhere outside of the Encounter's deployment zones and least 12" from the enemy deployment zone.

FULL STEAM AHEAD: This Unit may double its Drift during its Movement Step. If it does so it may not make any turns during the same Activation.

FURY GENERATOR: *The Fury pattern R7-1027 Generator provides a huge boost to a vessel's power system as well as other, more intangible benefits.* This Generator gives the Model +1 to its Speed Attribute and +4 to its Fray Attribute.

GIANT SLAYER: Each Model in the Unit may re-roll Blank Results in Attacks against an Initial Target with a Mass of 3 or more.

GRAVITRONIC IMPERILATOR: *This weapon distorts the gravity around the Initial Target.* A Model with this weapon is considered to be equipped with a Repulsion Field Generator. Furthermore, this weapon may be used to make attacks using the Gravitronic Imperilator weapon profile.

HAMMER SWEEP: During its Activation, Models in this Unit with this rule may increase their Speed by 1" and gain +2 to their Ramming Dice Pool if they make no turns during this Movement.

HEAVY CONODONTIC FLENSER: A Model armed with this weapon can fire in two ways when making an Attack. Using the Heavy Conodontic Flenser profile or as a Valour Effect, you may use the Heavy Particle Cannon profile instead.

HEAVY ESCORT: This Model may add +2 to the Defence Action Dice Pool on any friendly Models within 5". This bonus is in addition to any other bonuses such as being part of an Attached Unit.

HEAVY FIREPOWER: Once per Activation, before declaring an Initial Target, Each Model in this Unit with this rule may make the following Valour Effect. When making an Attack, up to three of that Model's weapons may contribute their Lead value to the Action Dice Pool, rather than the normal single Lead weapon value. Other Models may support this Attack but cannot benefit from this rule. Models with this rule still only have a single Lead weapon for Disorder purposes etc.

HEAVY PARTICLE CANNON: *The intensity of this weapon is explosively reactive with tricobalt gas. Unscrupulous Enlightened Captains have leveraged the fact that that this radioactive gas can be found in pressurized fuel tankage within Scythe aero-superiority fighters.* Attacks using a Heavy Particle Cannon are resolved as normal. Furthermore, a Unit making the Attack may make a Valour Effect if the Initial Target has Enlightened SRS Tokens in base contact. As a Valour Effect, you may discard up to

three of those Enlightened SRS Tokens to add +2 Dice to the Action Dice Pool for each SRS Token discarded. The discarded SRS Tokens do not need to be Friendly, only Enlightened. This rule cannot be used with Orca SRS Tokens.

HELLION COHORT: This Model may make assaults within 6" rather than the usual 4". Furthermore, the Assault by this Model gains the Sustained Quality, and this Model may Assault Aerial Models. This rule does not apply to Supporting Assaults.

HYDROPHONE RELAY: Attacks against Enemy Models within 10" of this Model ignore the Obscured rule.

HUNTER (X): To use this rule this Unit must be at least at its minimum Unit size. Once per Activation, this Unit gains +1 to an Assault or Attack Action Dice Pool for each Model with this rule that contributes to the Dice Pool provided that the Initial target has the Trait in brackets indicated by this rule.

IMMOBILE: Models with this rule are always deployed at the same time as Aerial Units. Models in this Unit with this rule have a Drift of zero and may not move or be moved. Treat Sturginium Flare Critical Damage as Catastrophic Explosions instead.

INSPIRATIONAL: Any friendly Model within 10" of a Model with this rule (but not including the Model with this rule itself) may reduce a single Disorder Level at the start of their Activation and may re-roll a single Action die each step of their Activation.

INTERPHASE NAVIGATOR: At the start of the Maintenance Step of the End Phase, this Unit may become an Interphased Unit. An Interphased Unit is removed from the Play Area, placed into Reserves, and a 50mm Interphase Marker is placed in the position of any one Model in this Unit. In subsequent Rounds, Interphased Units must be the first Units Activated in a Force. When an Interphased Unit is Activated, it is immediately deployed, and must be placed within 20" of any Interphase Marker in the Play Area. You must remove one of your Interphase Markers each time this happens. No Model in this Unit can be deployed touching another Model.

LAMARCKIAN BARRACKS: *This Unit has ghetto-like areas sectioned off for the training and hardening of especially savage assault forces. Body augmentation and use of performance enhancing narcotics such as hexspice, androgenics, fury-juice and steroidal anabolics create grotesquely muscled super-soldiers with over stressed metabolisms and high levels of aggression and pain tolerance. Success in such places earns preferential breeding and career advancement on their return to a Promethean Complex.* Assaults by this Unit (including Physeter Assaults) have the Sustained, Hazardous and Devastating qualities.

LANDING VESSEL: Models in this Unit may make a Special Operations Action known as Landing. If this Model comes into contact with terrain identified in the Encounter as a Landing Point, it does not suffer damage and may remain stationary, with a Drift of zero for the Round. Each Model in this Unit may place a number of Ground Assault Tokens equal to its Mass in a stack within 5" of the Landing Point. The Token stack must be placed on Ground Terrain. Once a stack of Ground Assault Tokens has been placed using this Model, then place this Model at least 2" from the Landing Zone in any direction desired. This Model loses the Landing Vessel rule for the remainder of the Encounter.

LARGE TARGET: During the Shooting Step a Model with this rule may be declared to be in more than one Fire Arc, provided that the Attacking Player can draw Line of Sight from that Fire Arc.

LINEAR DASH: Models in this Unit with this rule gain +2 Speed during its Movement Step provided that it makes no turns.

LOGISTICAL SUPPORT: This Unit adds +1 to the number of Victory and Valour Cards in a player's hand. Should this Unit be destroyed, the bonus is lost at the end of the Round. This ability does not stack so multiple Units with this rule still only confers +1 to the hand size in total.

LOW-LEVEL STRIKE: In the Special Operations phase of the round, while Battle Ready, this Unit may declare it is making a Low-Level Strike. For the remainder of that Round, the Unit doubles its Drift Movement, ceases to be an Aerial Unit and instead becomes a Skimming Unit. The Unit has +1 Armour while it has the Skimming Unit Positional Trait. A Unit cannot be part of an Attached Unit if making a Low-Level Strike. A Unit cannot make a Low-Level Strike if it has already done so the previous Round. During deployment, any Unit with this rule may deploy as a Skimming Unit making a Low-Level Strike for the first Round (though still counts as an Aerial Unit for Battlefleet selection purposes).

LUMBERING: This Unit *cannot have a Drift greater than 3"* and does not suffer Disorder from Collisions. All Gunnery targeting this Unit may re-roll Blank results on the Action Dice. This Unit may make a Full Reverse! Special Operations Action without receiving a Level of Disorder. Any additional levels of Disorder received once at Chaos & Disarray are ignored rather than causing damage.

LUMINIFEROUS DEFENCES: *Entropic generators integrated deep within Enlightened vessels are hardened against enemy disruption. These devices, when combined with dazzling screening arrays and other esoteric defences noticeably blunt the enemy's attacks. Any Attack against a non-Obscured Model with this rule counts Heavy Hit results as Hit Results instead in the Attack Action Dice Pool. Furthermore, any Unit with this rule may use their Crippled ADV to defend against any Attack with the Gunnery, or Broadside Qualities. Mass 1 Models use their Battle-Ready ADV. Submerged Models, Crippled Models or Models with Shredded Defences cannot use Luminiferous Defences.*

MAGNETIC GENERATOR: *A powerful electromagnet is housed within this generator and can be used to disrupt small arms fire close to the vessel as well as focused to affect larger aircraft. Any Heavy Hits against a Model with this Generator by weapons with the Aerial Quality or by Enemy SRS must be re-rolled. Exploding Hits are unaffected. Once per Activation this Model may target itself or a friendly or enemy Unit within 10". Roll an Action Dice for each SRS Token, Escort Token or Assault Token within 3" of the targeted Unit (roll separately for each stack). Remove one Token for each Exploding Hit result. If the Unit targeted is an Aerial Unit, then it also receives a level of Disorder on the closest Model in the Unit.*

MAGNETO ENCAPSULATOR: *This weapon projects a variable magnetic field that can be used to hammer enemy vessels at close range or disrupt incoming attacks. A Model with this weapon is considered to be equipped with a Magnetic Generator. Furthermore, this weapon may be used to make attacks using the Magneto Encapsulator weapon profile.*

MARITIME PATROL: Enemy Units with the Submarauder rule cannot be deployed within 10" of this Model. Models in this Unit with this rule may ignore the Deep Dive rule and Submerged Unit Position Trait when making Attacks on any Initial Targets within 10" of Models with this rule, or against Initial Targets with at least one SRS Token in base contact that is friendly to this Unit.

MECHANICAL SOUL: This Unit ignores the effects of the Emergency Condition, but counts as having the Disorder Level. Models in the Unit can only support Assaults with +1 AD to Fray.

MINE LAYER: Before Submerged Unit Deployment, for each Model in a Unit with this rule, the controlling Player may place a Minefield Marker anywhere in the Play Area provided that it is at least 10" from any Deployment Zone.

MINE SWEEPER: In the Special Operations step of its Operations Phase, a Unit with this rule may remove a Minefield Marker within 5" of a Model in this Unit.

NAVAL SHIELD AMPLIFIER: Any Friendly Surface Units within 10" of Models with this rule counts as having a Mass of +1 for calculating the effectiveness of their Shield Generators. The amplifier enables the Unit's Shield Generator to be limited to a maximum of 4 dice rather than the usual 3.

NULL-CLONE GENERATOR: In the Special Operations Step of the Operations Phase, all Enemy Models that have Generators and are within 5" of this Model receive the Generator Shutdown Critical Damage Marker unless they already have it. Furthermore, in the same Step, this Unit may target a Model within 15" of this Model. If the target has an Atomic, Fury, Magnetic, Repulsion Field, Shield or Shroud Generator then this Unit counts as having that Generator for the remainder of the Round.

ONYX CLADE TARGETING ARRAY: This rule cannot be used if this Model has Generator Shutdown Critical Damage. Weapons with the Arc Quality used by Models with this rule gain the Piercing Quality if the Initial Target is within 10" of any friendly Model with this rule. Furthermore, Enemy Units cannot be deployed within 10" of this Model. The Fog of War Rule has no effect on any targeted Unit that is within 15" of this Model.

ORCA SRS CAPACITY (X/X): *Alongside larger Physeter cousins, the Enlightened can call upon pods of cunning Orcas with deadly anti-ship weaponry grafted to them. These are a type of SRS Token with the following differences. The Battle-Ready Capacity / Crippled Capacity of each Model in this Unit is indicated in parenthesis. Each Model in this Unit may launch the indicated number of Orca SRS Tokens and place them in base contact with Friendly and/or Enemy Models. Each Orca SRS Token has a launch range of 30" and each Token contributes 5 Action Dice to their Attack Run, which has the Piercing and Submerged Qualities. Resolve the Attack Run before any others on the Attack Run Target. Instead of 'Weight of Fire', if the number of Orca Tokens in the Attack Run is greater than the Mass of the Attack Run Target, the Action Dice Pool gains the Sustained Quality. Orca SRS Tokens cannot make Attack Runs on Ground, Aerial or Skimming Units and must try to find New Targets if this situation arises (page 26 of the Rules). Targets of an Attack Run must use their SDV to calculate its Interception Dice Pool. Orca SRS Tokens cannot be targeted by the Flak Barrage rule.*

PHYSETER ASSAULT: This is a Special Operations Action that may be made by this Unit instead of a normal Assault this Activation. Each Model in this Unit with this rule may place Physeter Tokens in contact with a Submerged or Surface Unit as an Initial Target up to 20" away. These are Assault Tokens. At the beginning of the End Phase, before SRS Resolution, each Physeter Assault Token contribute 5 Action Dice to an Assault against that Initial Target. All Physeter Assault Tokens in base contact form a single stack and count as the Assaulting Model, and they ignore Counter Assaults. Friendly SRS placed in contact with Initial Target may support the Physeter Token stack in the Assault. All Physeter Tokens in the stack are discarded at the end of that Assault.

PHYSETER CAPACITY (X/X): *Communicating with these surgically augmented species of Cetaceans, the Enlightened have formed unlikely but potent allies in their quest to secure humanity's future. Mighty Physeters surge forth with assault troops embarked in boarding capsules mounted on the whale's flanks.* The Battle-Ready Capacity / Crippled Capacity of each Model in this Unit is indicated in parenthesis. Each Model in this Unit may launch the indicated number of Physeter Tokens and place them in base contact with Friendly and/or Enemy Models. These are a type of Assault Token when used in Physeter Assaults. Alternatively, Physeter Tokens placed in base contact with Models in Friendly Units up to 20" away count as Escort Tokens for the duration of the Round. They may not be placed in base contact with Mass 1 Friendly Models or Models that already have Escorts Tokens. A Friendly Unit may not have more than 4 Physeter Tokens as Escorts. As Escort Tokens, Physeters may only be destroyed if the triggering Attack contains the Submerged Quality. They are removed in the Maintenance Step of each Round.

POWERSLIDE: Models in this Unit with this rule may make its Drift Movement in a direction up to 90 degrees to Port or Starboard from ahead rather than directly ahead. The Model does not physically change its heading when it does so. This is not considered a Turn.

PRIORITY SIGNALS: Once per Round, if the Player with this Battle Ready Unit has a Valour Effect Cancelled in the Play Area, this Player may immediately attempt the Valour Effect again by using the Initiative value of a new card. That card is discarded as normal when making the Valour Effect and can be cancelled as normal if the opponent has a rule that enables them to do so.

REPULSION FIELD GENERATOR: *Originally developed by the Latin Alliance, this technology was quickly replicated with varying success by the rest of the world allowing seagoing vessels to briefly lift themselves clear of the water to avoid collision.* This Model gains +2 SDV, +2 ADV and the Powerslide rule. Furthermore, this Model may Move over any terrain or other Models during its Movement without causing a Collision. After it completes its Movement, this Model must not be touching any other Models or Terrain Features.

RESTRICTED FIRE ARCS: This Unit may only support an Attack with up to three weapons.

SCYTHING STRIKE: This Model gains +3 to any Ramming Attack it makes in its Activation.

SHALLOW DRAUGHT: This Unit treats Treacherous Water as Open Water.

SHARPSHOOTER: The Citadel of the Initial Target receives a -2 against Attacks with the Gunnery Quality by Models with this rule.

SHIELD GENERATOR: A Model with this Generator may use it to remove Action Dice equal to the Mass Attribute of this Unit from any Attack against it (to a Maximum of 3 dice). The Shield Generator cannot be used against Assaults or attacks with the Submerged, Arc or Bomb Qualities. A Model cannot be Obscured if it decides to use a Shield Generator against an Attack.

SHRAPNEL: The first Critical Damage result caused by an attack from this Unit is Shredded Defences. If the target is already suffering from Shredded Defences, then Critical Damage must be rolled as normal.

SHROUD GENERATOR: *These are a variety of technological marvels emitting billowing clouds, shimmering scatter fields or even belching fourth noxious blackness to hide the Model from sight.* This Model is Obscured while the generator is active. This Model still blocks line of sight as normal. Assaults, Ramming and Attack Runs ignore Shroud Generators.

SILENT STALKER: Units with this rule may be deployed at the start of an Encounter as a **Silent Stalker**. Units that do so are deployed at the same time as Vanguard moves and may be deployed anywhere at least 20" from the enemy deployment zone. Units deploying with **Silent Stalker** gain the Homing Quality to any Attacks with the Torpedo Quality until the end of that Round.

SPOTTER: If there is one or more SRS Tokens friendly to this Unit in base contact with the Initial Target, this Unit may re-roll blank results with any weapons with the Extreme Range Quality. Alternatively, this Unit's Initial Target cannot benefit from being Obscured if the Initial Target has at least one SRS Token friendly to this Unit in base contact.

SRS MINE CLEARANCE: During its Operations Step, while placing its SRS Tokens, this Model may also place tokens in contact with a Minefield Marker within 20". At the end of the Special Operations Step discard an SRS Token and roll an Action Die. On an Exploding Hit, the Minefield Marker is discarded. You may repeat this attempt as many times as there are SRS Tokens remaining in the stack. If the Minefield Marker is discarded, any remaining SRS Tokens in the stack may be placed on another Minefield Marker within 5" to continue a Mine Clearance attempt on that Marker. If there are not any Minefield Markers within 5", the SRS Tokens remain in place until the End Phase when they may Scramble or Find New Targets.

SRS RECON: During its Operations Step, before placing its SRS Tokens in Base Contact with Models in the Play Area, a Unit with SRS Capacity may discard one or more tokens. Each SRS token discarded allows the player to discard a Victory and Valour card from their hand and replace it with the top card from their Deck. Unspent tokens may be placed and used as normal.

STRATEGIC ASSET: This Unit is worth +1 Victory Point to the Controlling Player of this Unit at the end of the Encounter if it is still in the Play Area. If this Unit is destroyed by an Assault Action, it awards +1 Victory Point to the Controlling Player of the Assaulting Model.

STRATEGIC WITHDRAWAL: At the start of the Maintenance Step of the End Phase, unless one or more Models in the Unit has Navigation Lock Critical Damage, this Unit may be placed back into Reserves. If so, Crippled Models in the Unit are immediately destroyed.

SUBMARAUDEUR: Instead of being deployed as normal for the Encounter, this Unit may instead be held in Reserve as a Submarauder. On each Round, Submaraunderers are Activated before all other Units in the Force. During the first Round, a Submarauder does not Roll for deployment when Activated and instead a 50mm Submarauder Marker is placed anywhere in the Play Area outside of either Player's deployment zone and at least 2" from the nearest Terrain feature. From the second Round onwards when a Submarauder Activates, it is immediately deployed. When a Submarauder is deployed, it must be placed within 10" of any Submarauder Marker or Wreck Marker in the Play Area. You must remove one of your Submarauder Markers each time this happens. No Submarauder Model can be deployed touching another Model. When a Submarauder is deployed it uses the Crippled profile of their weapons for that Round. Unless one or more Models in the Unit has Navigation Lock Critical Damage, at the start of the Maintenance Step of the End Phase this Unit may be removed from the Play Area and become a Submarauder again. Leave a 50mm Submarauder Marker in the position of any one Model in this Unit. The Unit are placed back into Reserves as Submaraunderers. On subsequent Rounds Submaraunderers may be deployed again as outlined above and are deployed within 10" of any Submarauder Marker or Wreck Marker.

SUPERIOR VOID-ENGINE: As a Special Operations Action during its Activation, this Unit may declare that it will activate its Superior Void Engines. The Unit may either target an Enemy or a Friendly Unit within 10". If this Unit targets an Enemy Unit, it creates lethal spatial rift. The Active Player applies a Catastrophic Explosion to a Model in the targeted Unit, with an additional point of damage caused equal to the number of additional Models with this rule in this Unit. Alternatively, if this Unit targets either itself or a **non-Immobilized** Friendly Unit, roll a number of Action dice equal to the number of Models in this Unit and choose one result as a Turbo Encabulation test (see Turbo Encabulation Drive). Apply the result of the test to the targeted Unit. The number of dice rolled in this specific test is not affected by the number of times a Turbo Encabulation test has already been made this Round, though it is still a Turbo Encabulation test and may affect other tests made that Round.

SUPPLY DEPOT: Any Friendly Model within 7" may remove a single level of Disorder at the start of their Activation. Any Friendly Units that move within 7" of this Unit regain any weapons that were lost in the Encounter because of rolling a blank for the Limited Quality Action Die. Restored weapons must roll for the Limited Quality each time used again as normal.

TEMPERAMENTAL DESIGN: This Unit cannot make Jury-Rigged Repairs. When making Repair Rolls affecting this Unit, two successes are required to remove each Critical Damage Marker. Repair Rolls using the Advanced Repair Facilities rule ignores this rule.

TERROR FROM ABOVE: This Unit may Ram Ground Units and Surface Units, even if it moved less than 3" in the Movement Phase. This Unit adds +3 to its Ramming Dice Pool when making a Ram against Ground Units and Surface Units.

TERROR FROM BELOW: This Unit may Ram Surface Units even if it moved less than 3" in the Movement Phase. This Unit adds +3 to its Ramming Dice Pool when making a Ram against Surface Units.

TRACER FIRE (X): Models in this Unit with weapons that have the Quality in brackets indicated may re-roll blanks when making Attacks against Initial Targets.

TRANSDUCTIVE POWER LINK: This rule cannot be used on Ramming Actions or if this Model has Generator Shutdown Critical Damage. Weapons with the Arc or Agitation Quality used by Models with this rule gain the Piercing Quality if **part of an Attached Unit with this rule, or if another Unit with this rule is within 15"** of either the Attacking Unit or the Initial Target. Furthermore, once per Activation this Unit may add +3 additional Action Dice to one Attack Action Dice Pool.

TRIANGULATED SOLUTION: A single Attack with the Torpedo Quality by this Unit each Activation receives +5 action dice if the Initial Target is within 15" of a Model with the Hydrophone Relay rule.

TURBO ENCABULATION DRIVE: *"I am unleashing energies that sunder cause and effect, beginning and end... my encabulator takes us to a place of mystery more profound than any demons you claim you see there."* - Lord Salwin Kraft-Haggart. *This small void engine warps space around the Unit displacing it in local space-time. The more the drive is used the easier it can be to operate it, but the more dangerous the transit itself becomes.* Instead of the Movement step for a Unit with this rule **that has no Levels of Disorder, they may instead** make a Turbo Encabulation test. Add an additional die to the roll for each time a Turbo Encabulation test is attempted by the Force in the same Round (so the second use that Round you would roll two dice, the third, three and so on). The Active Player may choose any single result from the dice rolled, except you must always choose a blank if rolled.

Perfect Encabulation: The affected Unit is removed from the Play Area and Placed at a new point anywhere in the Play Area. It gains a Level of Disorder and keeps the same facing.

Satisfactory Encabulation: The affected Unit is removed from the Play Area and Placed at a new point in the Play Area completely within 30" of its original position. It gains a Level of Disorder and keeps the same facing.

Delayed Encabulation: The affected Unit is removed from the Play Area and placed into Reserves.

Failed Encabulation: The affected Unit makes a Drift move, receives a Level of Disorder, and then ends its Activation if it has one.

Turbo Encabulation tests may not be re-rolled or otherwise manipulated except by a rule that specifically affects Turbo Encabulation tests. Models Placed must be in Open Water and in Coherency. **Models in the Unit may not Assault or Ram and may only fire weapons using the weapon's Crippled profile** after having a result applied to them from a Turbo Encabulation Drive test. **Submerged Units may not use this rule.**

UNEXPECTED ARRIVAL: Instead of being deployed as normal for the Encounter, this Unit may instead be held in Reserve (see Operations for details). If in Reserve in Round one, the Unit must make a Reserve Roll as normal, however, from Round two, or any subsequent Rounds, this Unit may use this rule to immediately deploy from Reserves. Unlike other Units in Reserve, Units declaring that they are using this rule must Activate and deploy before any other friendly In Play Units. When this Unit uses this rule, it is placed at any point in the Play Area that is at least 2" from the nearest terrain feature. No Model in the Unit can be deployed touching another Model. On the Round it enters play with this rule, Models in the Unit may only fire weapons or Ram using the weapon's Crippled profile. All Models in an Attached Unit may deploy with this rule if the Partner Unit has it. On the Round after deployment, this Unit may Activate as normal.

UNSTOPPABLE: After this Model performs a Ramming action, it is removed from the Play area before disengaging and is Placed the other side of the Impacted Model, retaining its facing as though it had just passed through the Impacted Model and emerged the other side.

USEFUL FREIGHT: Once per turn on their Activation, for each Model in this Unit, the controlling Player may look at the top card from their Victory and Valour Deck. They may discard the card or return it to the top of the deck.

VANGUARD: Starting with Player B, after both sides are deployed, each player may choose one of their Units with the Vanguard rule and make a free Move of up to 5". This is not an Activation and does not have Drift or Turn Limit. Vanguard alternates between Players until all such Units have been selected.

VOID SHEPHERD: Once per Round, this Unit, or a Unit within 5" of this Unit, may re-roll a single blank result on a Turbo Encabulation roll.

VULNERABLE STERN: This rule affects Shooting Attacks against this Model, where this Model's Aft Fire Arc is the closest point to the Model making the Attack. Such Attacks gain the Devastating Quality. After any other effects or Critical Damage Markers have been applied from that Attack, if at least one Point of Damage has been caused by that Attack, inflict a Navigation Lock Critical Damage Marker if the target does not already have one. Attacks with the Blast, Bomb or Magnetic Qualities ignore this rule.

WAVELURKER: Any Unit with this rule may plunge into a shallow dive during Special Operations Step of its Activation. This is called Wavelurking. All Models in the Unit replaces the Surface Unit Position Trait for the Submerged Unit Position Trait until **the end of Round. A Model cannot use this rule if it was a Wavelurking Model in the previous Round** (meaning it cannot be used in consecutive turns). A Model immediately ceases to be Wavelurking if it has a Navigation Lock Critical Damage Marker or the Chaos and Disarray Level of Disorder. **During deployment, any Unit with this rule may deploy as a Submerged Unit Wavelurking for the First Round.** They are still considered Surface Units for Force selection purposes.

GENERATORS

Many Covenant Units may take Generators, either incorporated into the superstructure of a Model or else, they are installed in place of a Heavy Gun Battery as an upgrade indicated in their relevant entry in this ORBAT. Each Model in a Unit that has access to Generators may take a different Generator or may not take one at all. Each Covenant of the Enlightened Generator confers the benefits as described below and normally remains active for the remainder of the game unless the Model suffers a Generator Shutdown Critical Damage Marker. Generator abilities are conferred only to the Model it is mounted on.

IMPORTANT: Duplicate Generators have no cumulative effect on a Model. A Model may only benefit once at any time from a type of Generator. Generators listed on a Unit's profile may not be removed or replaced unless specified.

BATTLEFLEETS

Each Force must include one or more Battlefleets. There are a number of Battlefleets available to the Force, each with an array of units to choose from and some even with additional rules or benefits. Each Battlefleet has the following restrictions unless stated otherwise in the Battlefleet itself:

MAIN

- Your Force **MUST** include at least one Main Battlefleet before it includes any Specialist Battlefleets or Mercenary Battlefleets.

- You cannot include more than one of any specific Unit, and only one of each Unique Unit in your Force.

- You cannot include more than one Unit with the Flagship trait.

- Any Units forming Attached Units must come from the same Battlefleet and must have the same Position Traits (except Submerged Units that can also be Joining Units to Surface Units).

BATTLEFLEET BONUS

Some Battlefleets provide bonuses to players for fulfilling certain requirements. These are indicated in the Battlefleet itself though some of the most common are detailed below:

COMMAND OVERRIDE: If a Battlefleet has this rule, once per Encounter the Player may declare they are using the Battlefleet's Command Override to immediately cancel all the dice results in any one Action Dice Pool generated by Units in the Force. The Command Override must be played before any manipulation of the Action Dice Pool takes place by either Player. The Action Dice pool is then rolled afresh exactly as if the previous Action Dice Pool had not been rolled. You may not cancel part of the Action Dice Pool or another Player's Action Dice Pool using this rule.

PRELIMINARY SURVEY: At the start of the Encounter, when revealing the top card from their V&V deck to determine deployment, any Player with one or more Battlefleets with this rule in their Force may draw a second card in place of the first card revealed if they wish. They may only do this once per Encounter and must accept this second card. If both players have Battlefleets with this rule, then neither may draw a second card.

PHYSETER AMBUSH: At the start of the first Round, provided at least one Battlefleet has this rule, the Enlightened player creates a stack of Physeter Assault Tokens in what is called a Physeter Ambush. This stack consists of a Physeter Assault Token for each Battlefleet in their Force with this rule. At the start of the First Round, after all deployment, this stack is Placed in base contact with an enemy Surface Unit or Submerged Unit of the players choice. Each Physeter Assault Token contribute 5 Action Dice to an Assault against that Surface Unit or Submerged Unit in an Assault Action that takes place in the End Phase just prior to SRS Resolution. The Physeter Assault Token stack count as the Assaulting Model, and they ignore Counter Assaults. Friendly SRS placed in contact with Surface Unit may support the Physeter Assault Tokens. Up to four additional Physeter Assault Tokens may be added to this Physeter Ambush stack for +12pts per Token. The stack may not be split, and all Physeter Assault Tokens in the stack are discarded at the end of that Assault.

STRATEGIC RESERVES: Either all Units in this Battlefleet are held in Reserve, or none of them. When rolling for deployment from Reserves, Units in this Battlefleet may cancel the Reserve Action die result rolled and instead treat the result as a Heavy Hit. If they do so, they must use the Crippled profile of their weapons for that Round.

VALOROUS CONDUCT: Once per Round, per Battlefleet with this rule, a Unit in this Force may replace the Initiative value of a card being used for a Valour Effect card with the Initiative value of 50.

ENLIGHTENED PATRONS

You may include a single Patron from those listed below for a Covenant of the Enlightened Force in any Encounter of Dystopian Wars.

- **CHOOSING A PATRON** – When choosing your Force, you may also choose one of the Patrons listed in your Faction ORBAT. These Patrons have rules that will apply to your entire Force. You may only pick one Patron for your Force.
- **PATRON COST** – Each Patron has an associated cost. This cost is the number of Victory Points you award your opponent at the start of the Encounter. If both players use Patrons, then each Player is awarded points based on their opponent's Patron. If only one Player has a Patron, then only their opponent will get the points based on that Patron's cost.
- **PATRON RULES** – A Patron's rule may provide a specific exception to rules found elsewhere. In cases of contradiction, the Patron's rule is used.

❖ JULIANNA DRAKENBURG – TECHNOCRATIC SPYMASTER

PATRONAGE: +2VP

During the Maintenance Step of the End Phase, you may choose to discard a Victory & Valour card from your hand and replace it with any one card of your choice (with a value of 40 or less) from your discard pile.

EURIPIDES AUTOMATA: Any Battlefleet in this Faction that includes a Chione Subnautical Explorer Unit MUST include one Unit of Euripides Ambush Submarines. There is no cost for this Unit, and it increases the Submerged Unit limitation for the Battlefleet by one, to account for this Unit. When the Chione is deployed, you must immediately deploy a Unit of Euripides Ambush Submarines [completely](#) within 5" of this Unit in Open Water. Destroying the Euripides Unit does not confer a Squadron Killer Victory Point bonus.

MICROWAVE CONTROL NODE: Friendly Models with the Automata Trait within 10" of this Model may add 2 Action Dice to their own Repair Tests. Furthermore, if this Unit suffers a Catastrophic Explosion, the damage caused by the Catastrophic Explosion itself may be ignored and instead a single Friendly Model with the Automata Trait within 10" is immediately Destroyed.

Weapons

- Gun Battery – F/P/S

Options:

- The Unit may take up to four Escort Tokens for +5pts each.
- The Unit may replace any Gun Battery with a Rocket Battery for free. The new weapon retains the Fire Arcs of the weapon it replaces.

GRAND CONVEYOR: This Unit may be modelled with an extended hull for +20pts. If so, it has a Battle-Ready Hull Attribute of 6.

OLYMPIA-PATTERN: Unless accompanied by Escort Tokens, this Unit may exchange the Surface Unit trait for the Skimming Unit Trait for +10pts. It may still be accompanied by an Akron Aerial Escort Token.

Not every Covenant Commodore has access to a Descartes Control Ship and so the Temoja shipyard created the Vesalius to ensure that the welfare and effectiveness of their cetacean allies is maintained. Of course, in a faction that rarely does things by half measures, there are certain fleets that contain multiple Descartes and Vesalius to support hundreds of cetaceans.

Battle Ready	2	5	4	6	11	0	2	9	4
Crippled	2	4	3	6	11	0	1	8	4

The Australian Peer, Thaddaus Wild, created these large ocean-faring automata for deep sea mining and mineral extraction. While they lack a crew, their impressive offensive capabilities are a testament to Wild's ingenious design. The Great Powers, despite this absence of crew, categorize the Aronnax as a type of colossus.

Squadron: Unless taken as an Attached Unit, this Unit may include up to two additional Models at a cost of +136pts per Model.

NEMESIS PROTOCOL: Once per Activation, this Unit may make the following Valour Effect provided the Valour card discarded has a value of at least 40 (including by Valorous Conduct). Instead of using it as Ramming weapon this Activation, any Coeus Shockmaw may be used in the Shooting Phase in the Fore Arc to make an Attack against an Initial Target with the Heavy Particle Cannon weapon profile. The Attack ignores Shield Generators, Storm Generators, Guardian Generators and Shroud Generators.
